GLOBAL POWER PLATFORM BOOTCAMP

Organized Globally, Held Locally

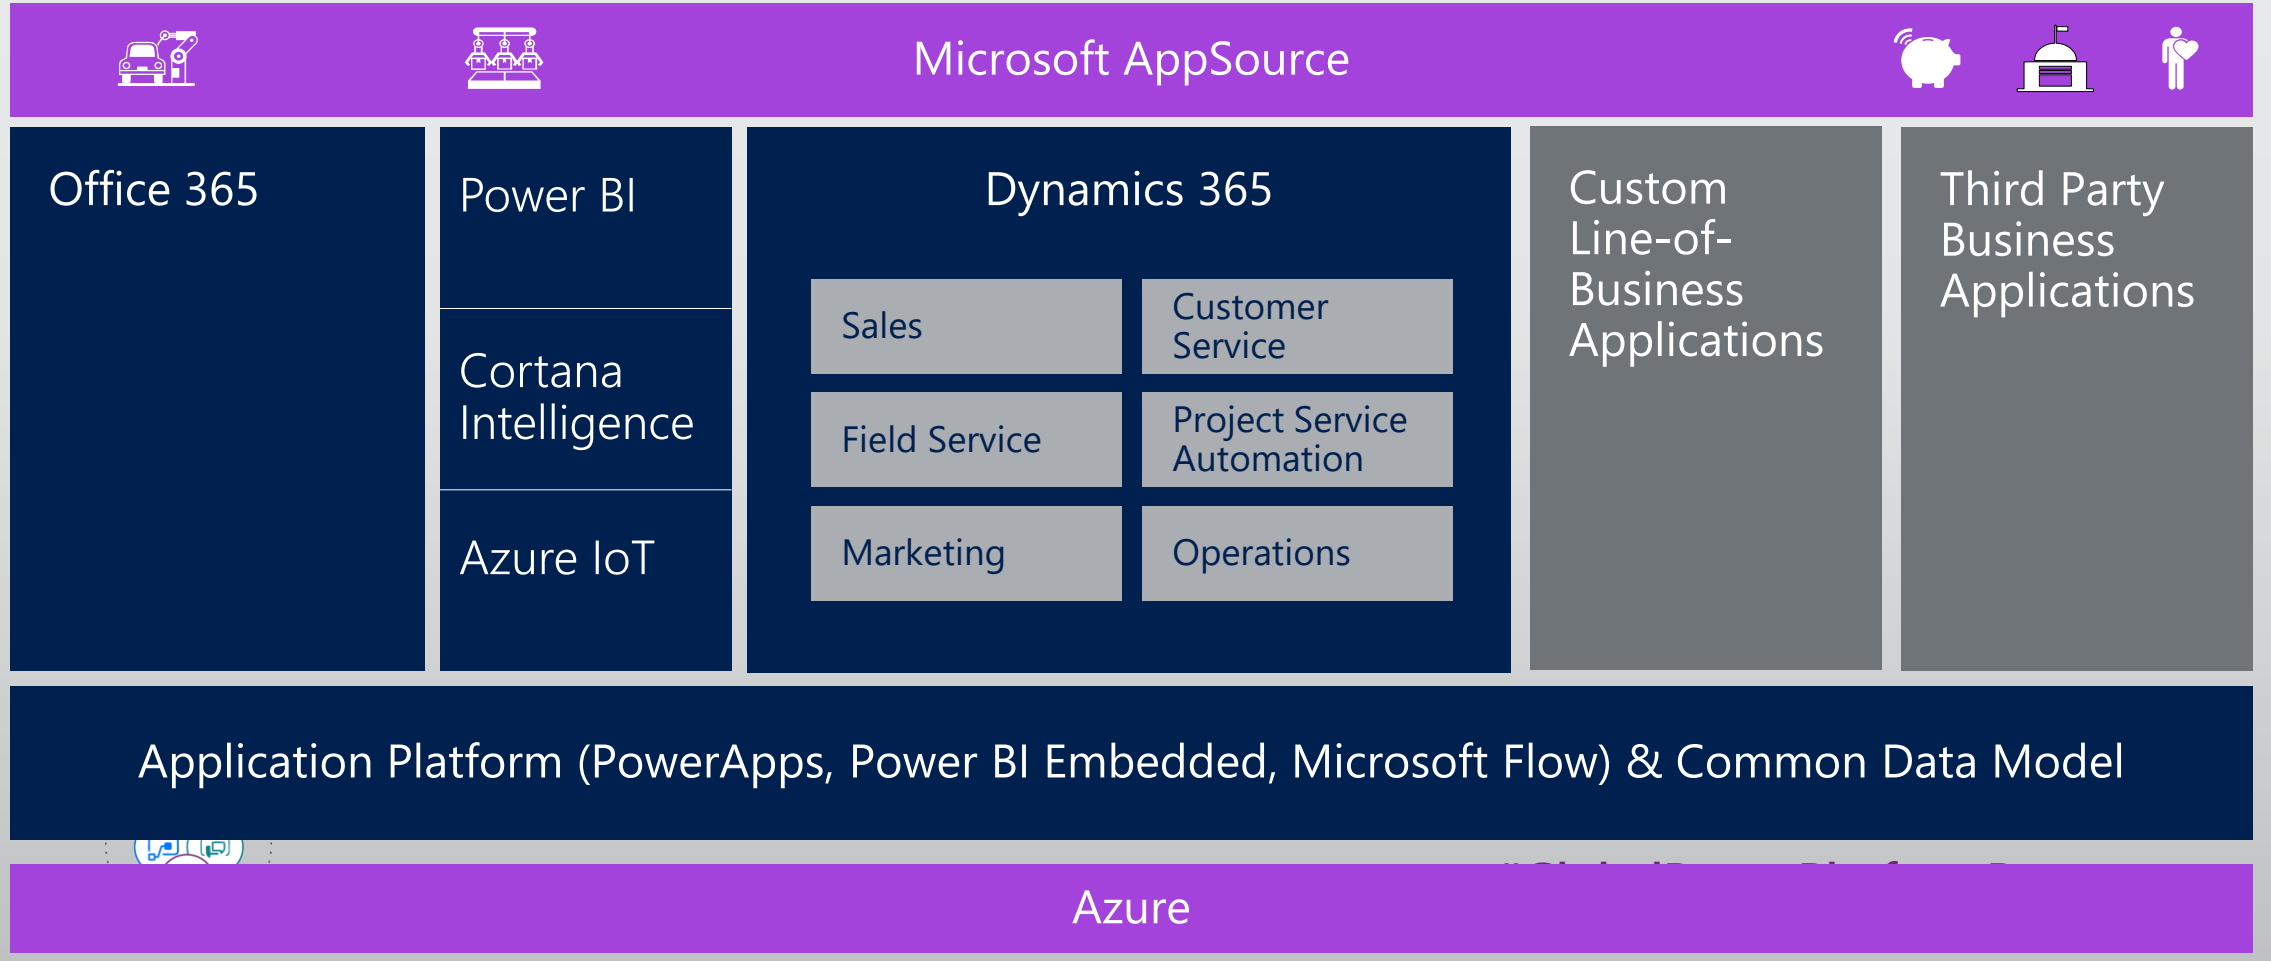
PowerApps + CDS

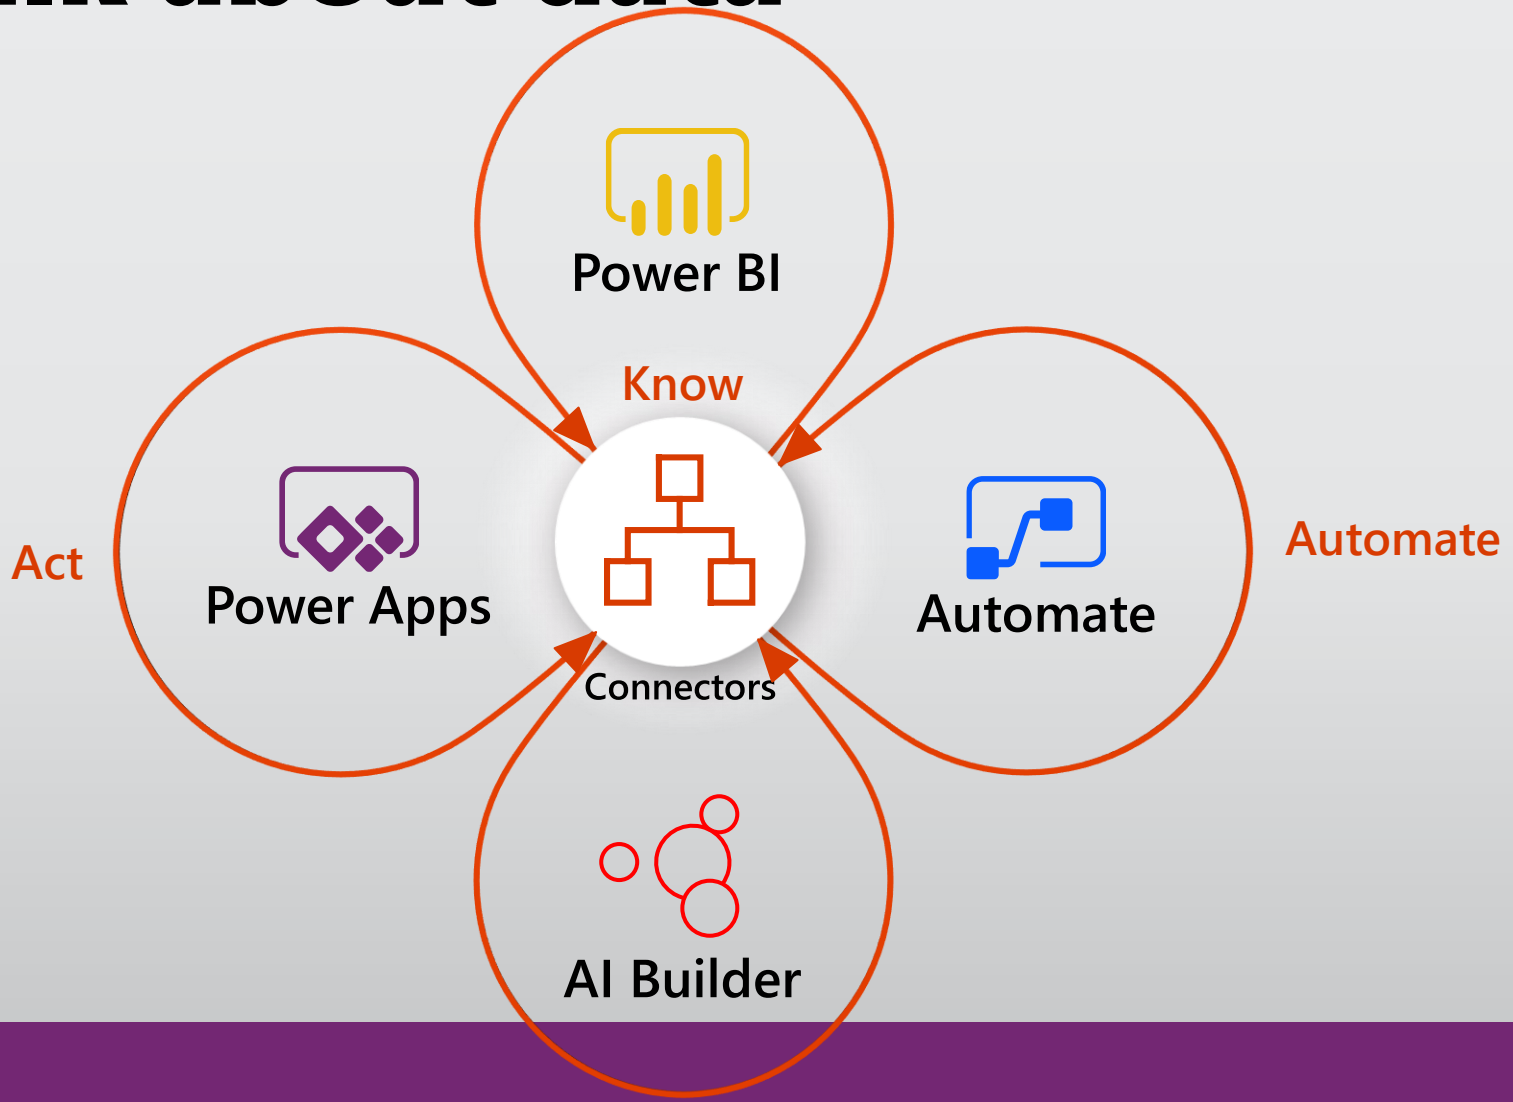
MVP | MCT Juan Rafael

@jlc_rve

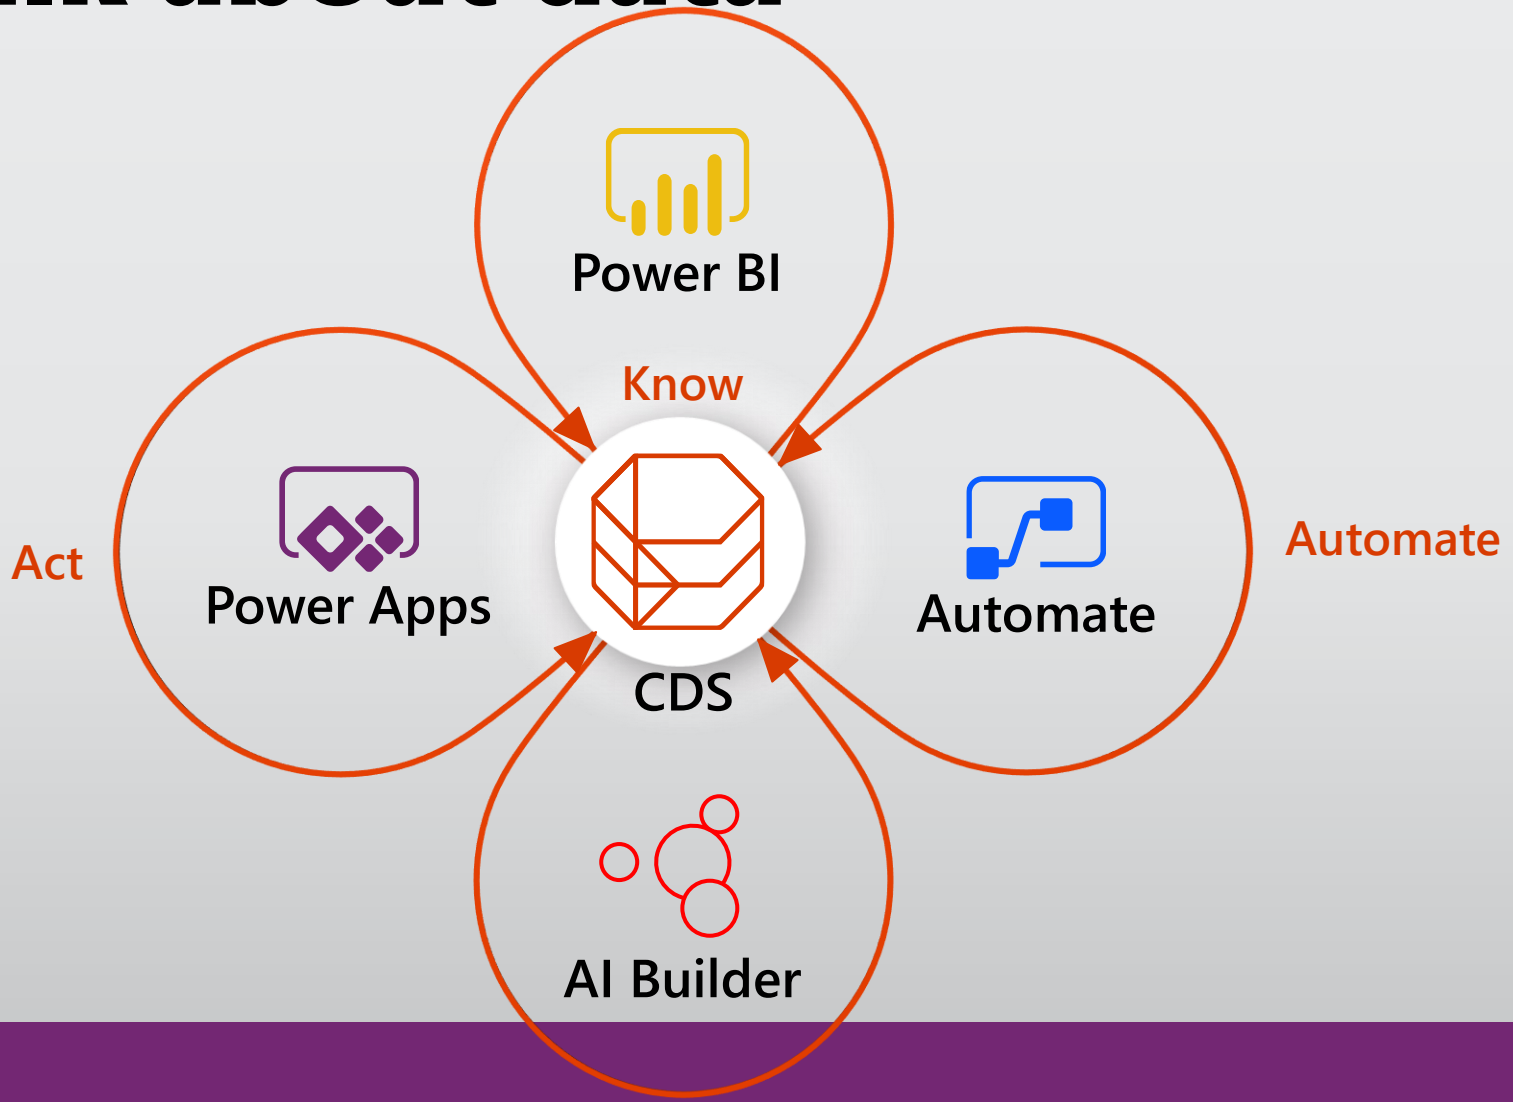
Only Microsoft has all the pieces to deliver an intelligent business cloud



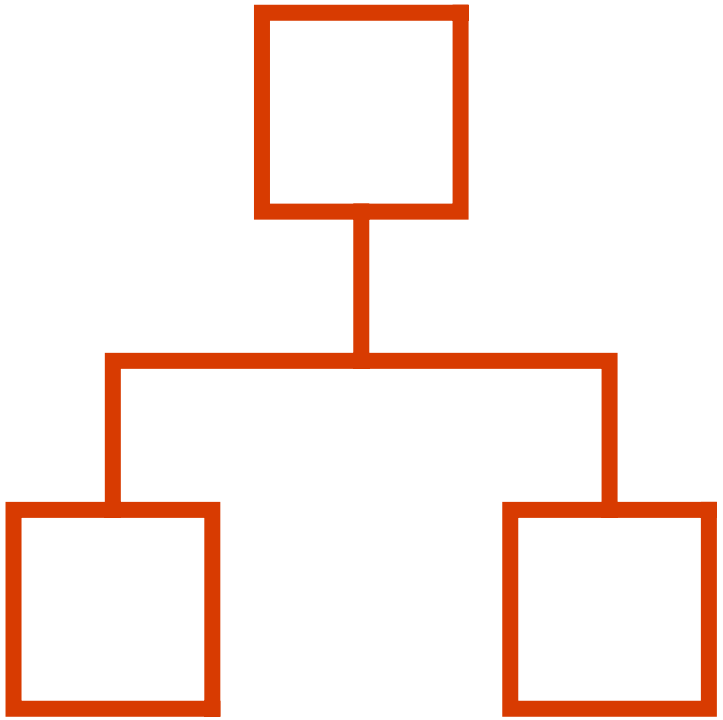
Let's talk about data



Let's talk about data



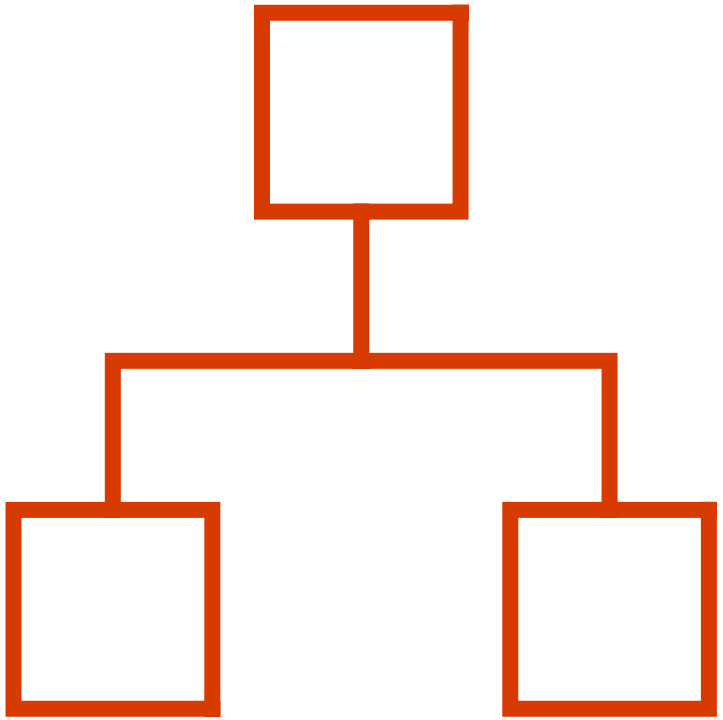
Two Types of Data. . .



External

Internal

Two Types of Data. . .



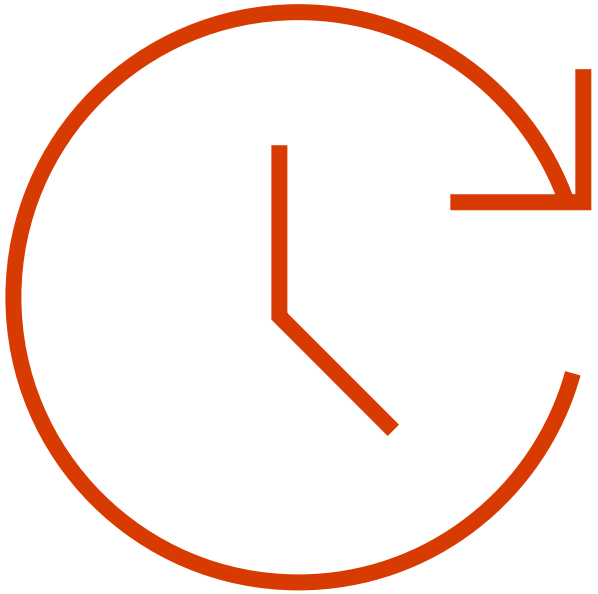
Connectors

Common Data Service

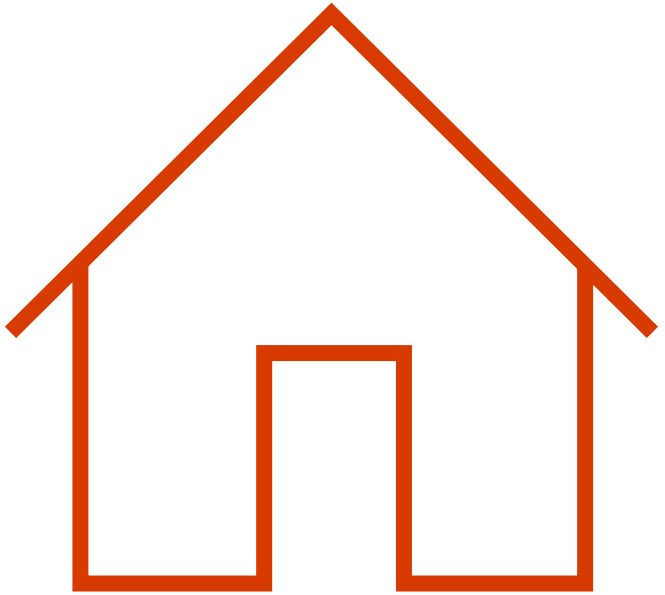
Oh, the apps you can build. . .

Client	Connectors	Common Data Service
Power Apps (Canvas)	Yes	Yes
Power Apps (Model)	No	Yes
Power Portals	No	Yes
Flows	Yes	Yes
AI Builder	No	Yes
PowerBI	Yes	Yes

Why external data (Connectors)?



It’s easy



It’s home

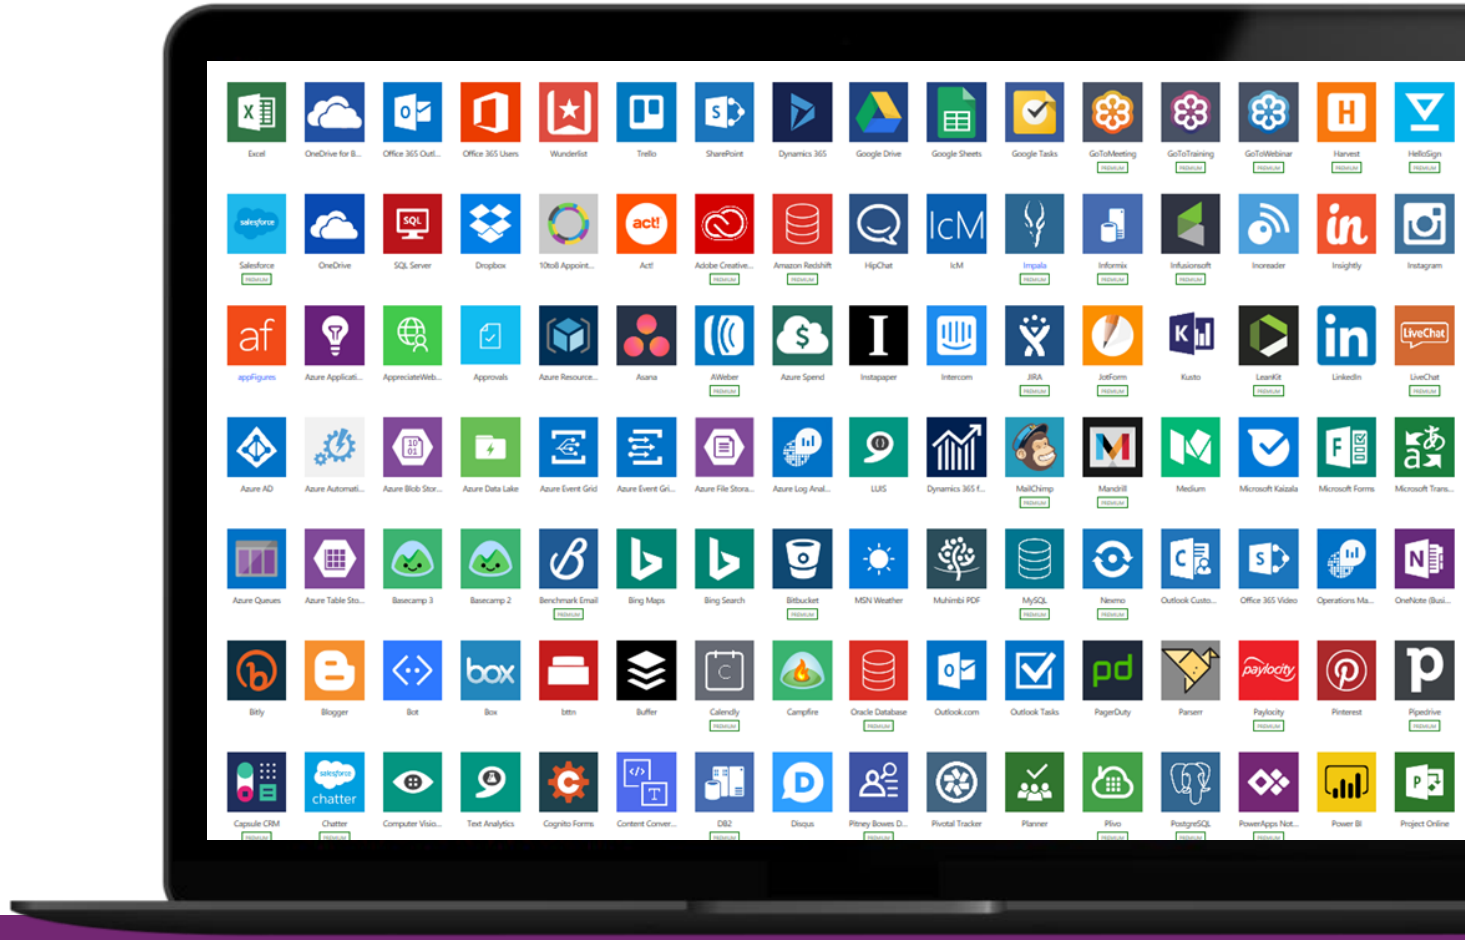
Why external data (Connectors)?

Built-in connectivity to 275+ cloud services, content services, databases, APIs, etc.

Seamless hybrid connectivity to on-premises systems via the on-premises data gateway.

Develop and register custom connectors as a building block for citizen developers.

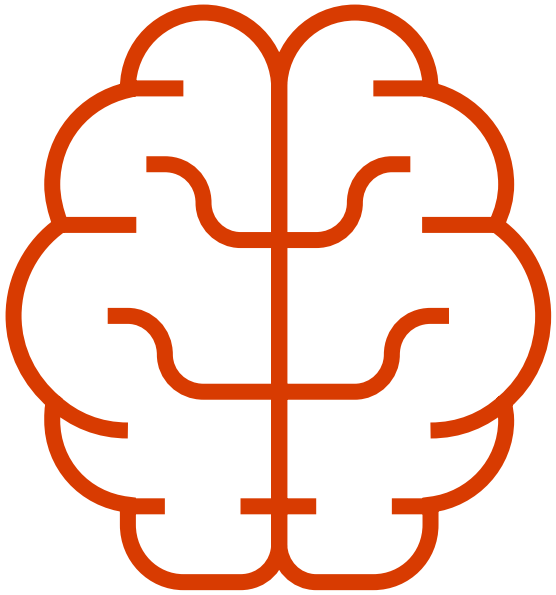
Connect data silos by using multiple data sources in a single application.



POWER PLATFORM BOOTCAMP

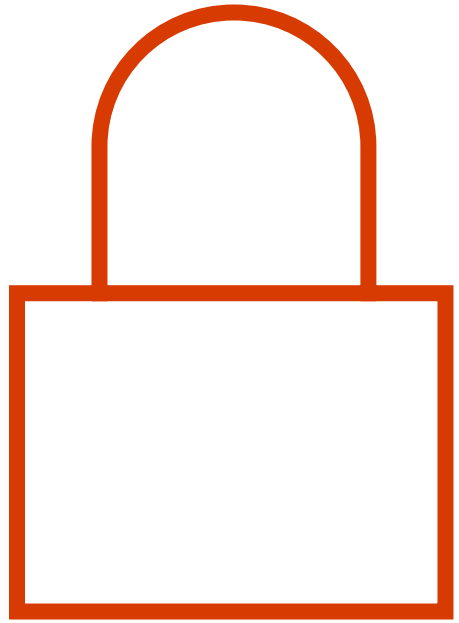
#GlobalPowerPlatformBootcamp

Why internal data (Common Data Service)?



It’s smart

It scales



It’s secure

What is the Common Data Service?

The Common Data Service *easily structures*
a *variety of data and business logic* to support
interconnected applications and processes
in a *secure and compliant manner*

What is the Common Data Service?

The Common Data Service *easily structures*
a *variety of data and business logic* to support
interconnected applications and processes
in a *secure and compliant manner*

What is the Common Data Service?

The Common Data Service *easily structures*
a *variety of data* *and business logic* to support
interconnected applications and processes
in a *secure and compliant manner*

What is the Common Data Service?

The Common Data Service *easily structures*
a *variety of data and business logic* to support
interconnected applications and processes
in a *secure and compliant manner*

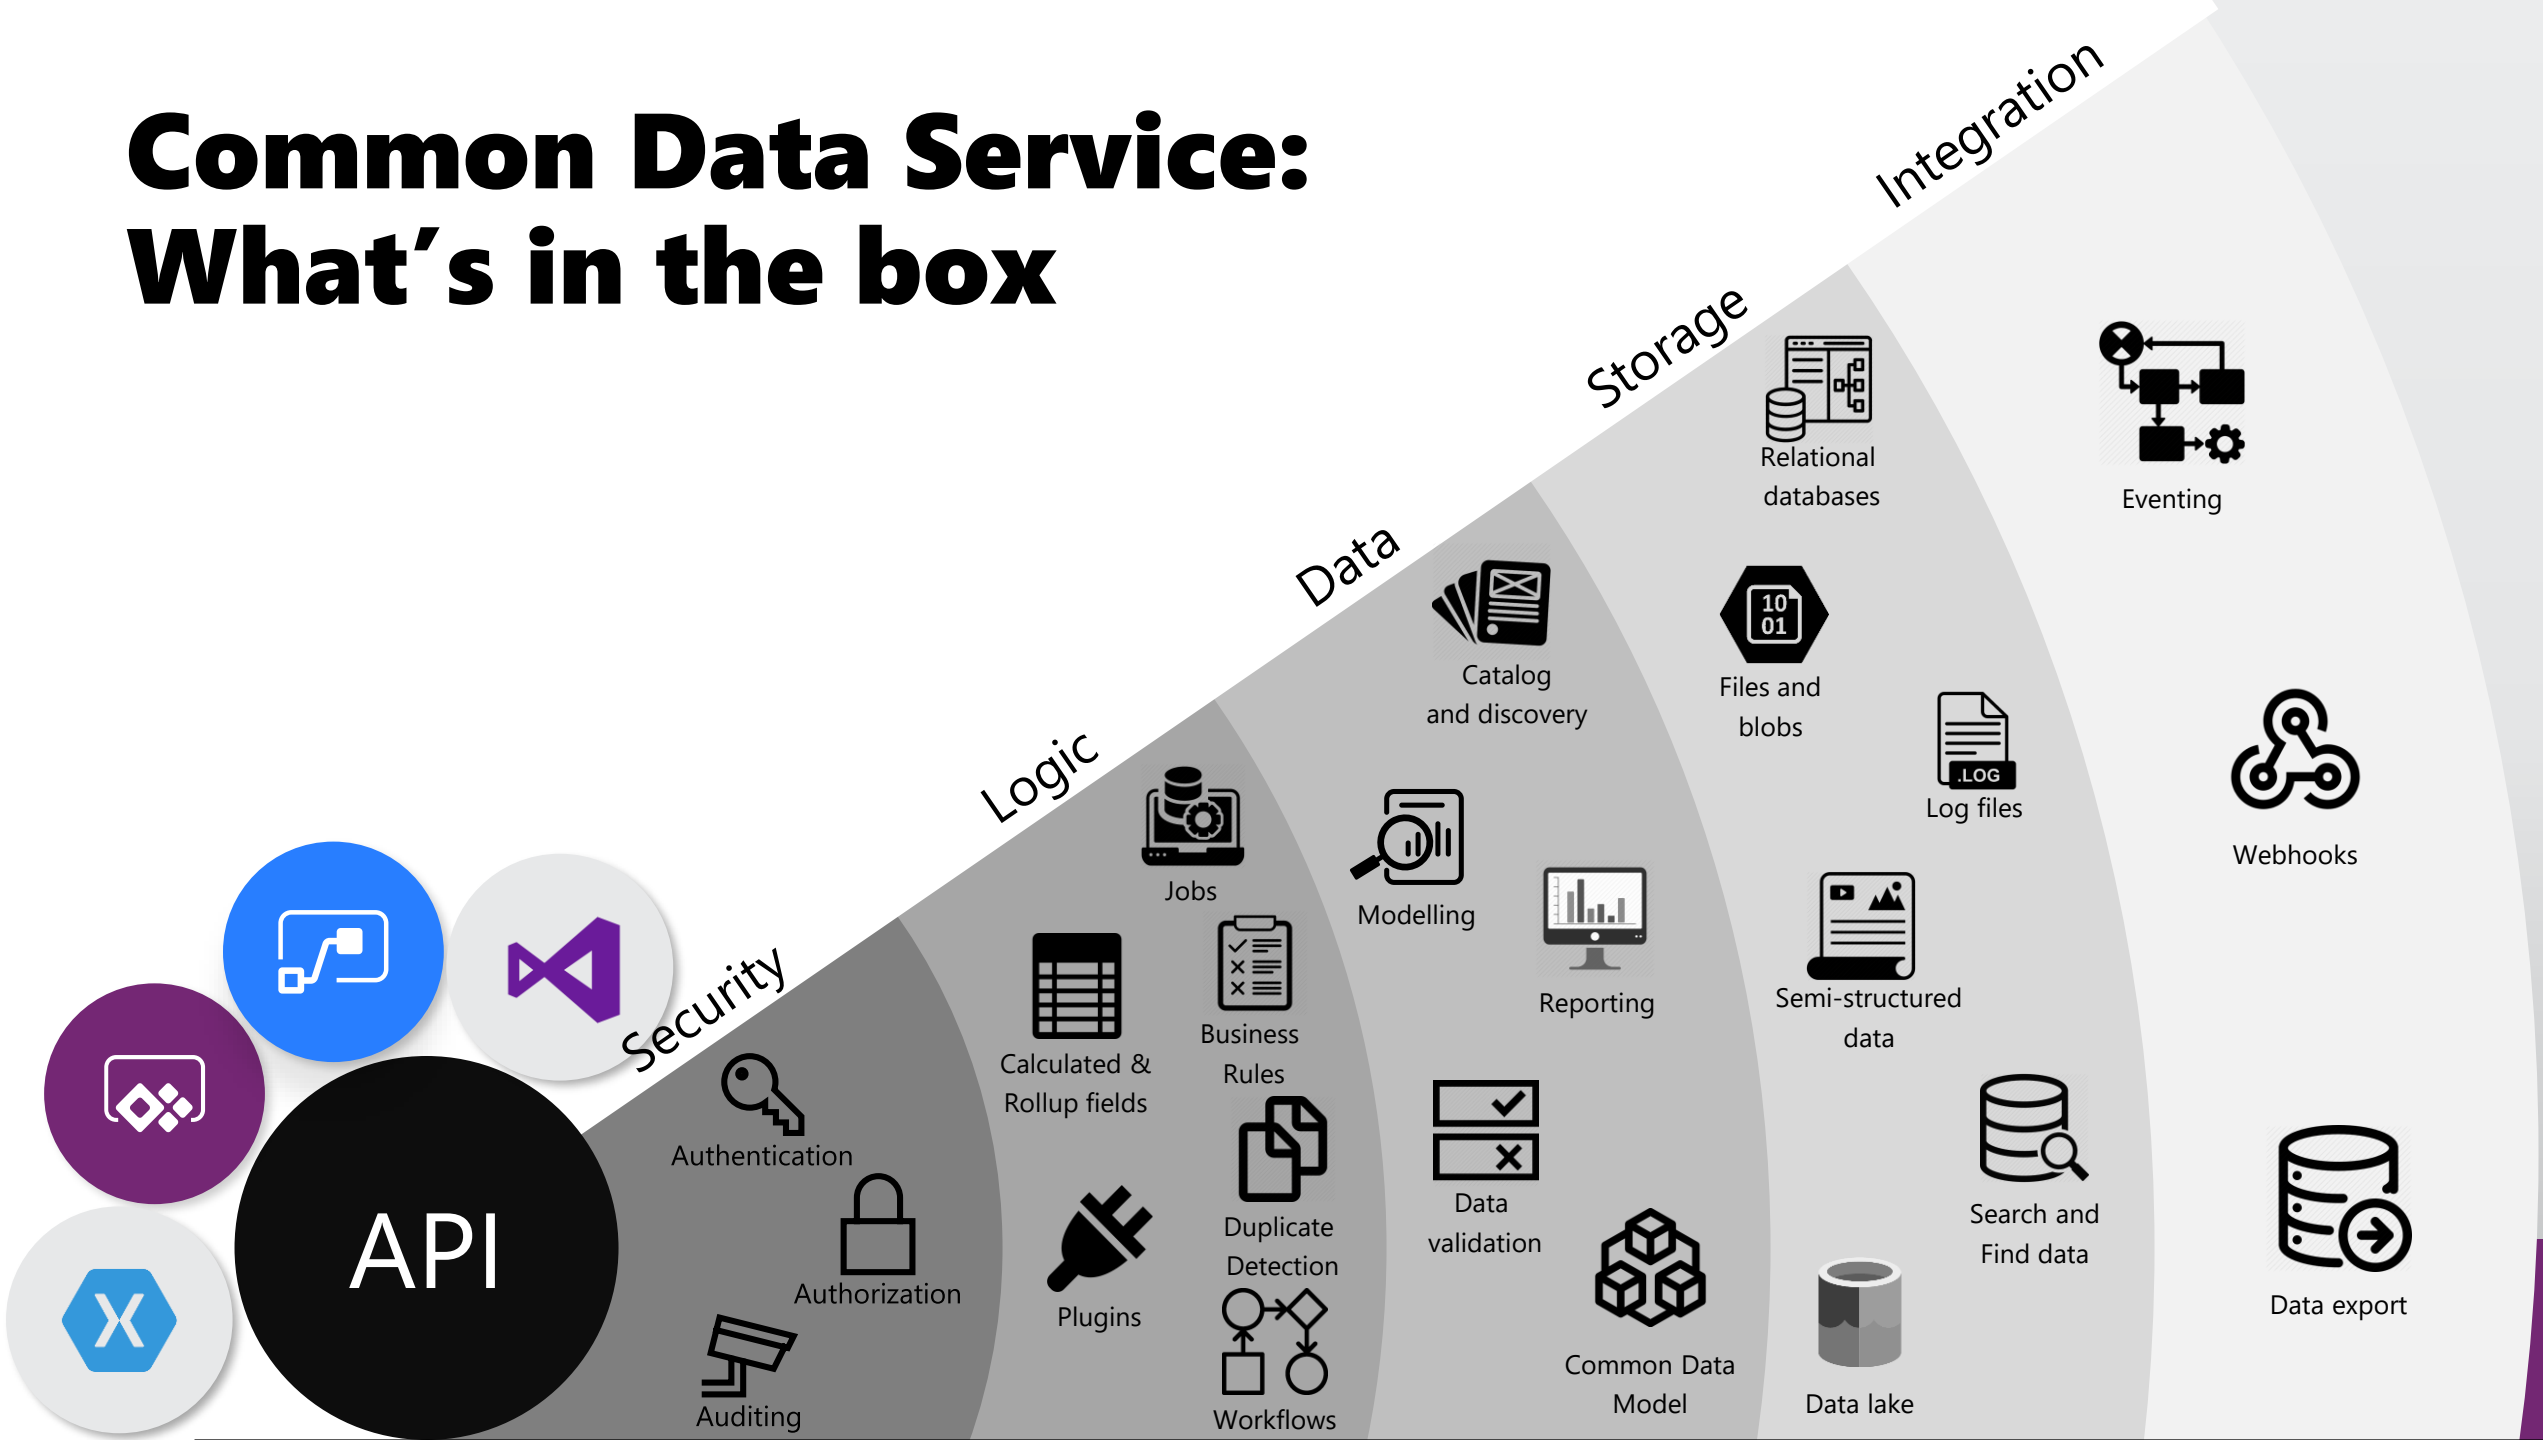
What is the Common Data Service?

The Common Data Service *easily structures*
a *variety of data and business logic* to support
interconnected applications and processes
in a *secure and compliant manner*

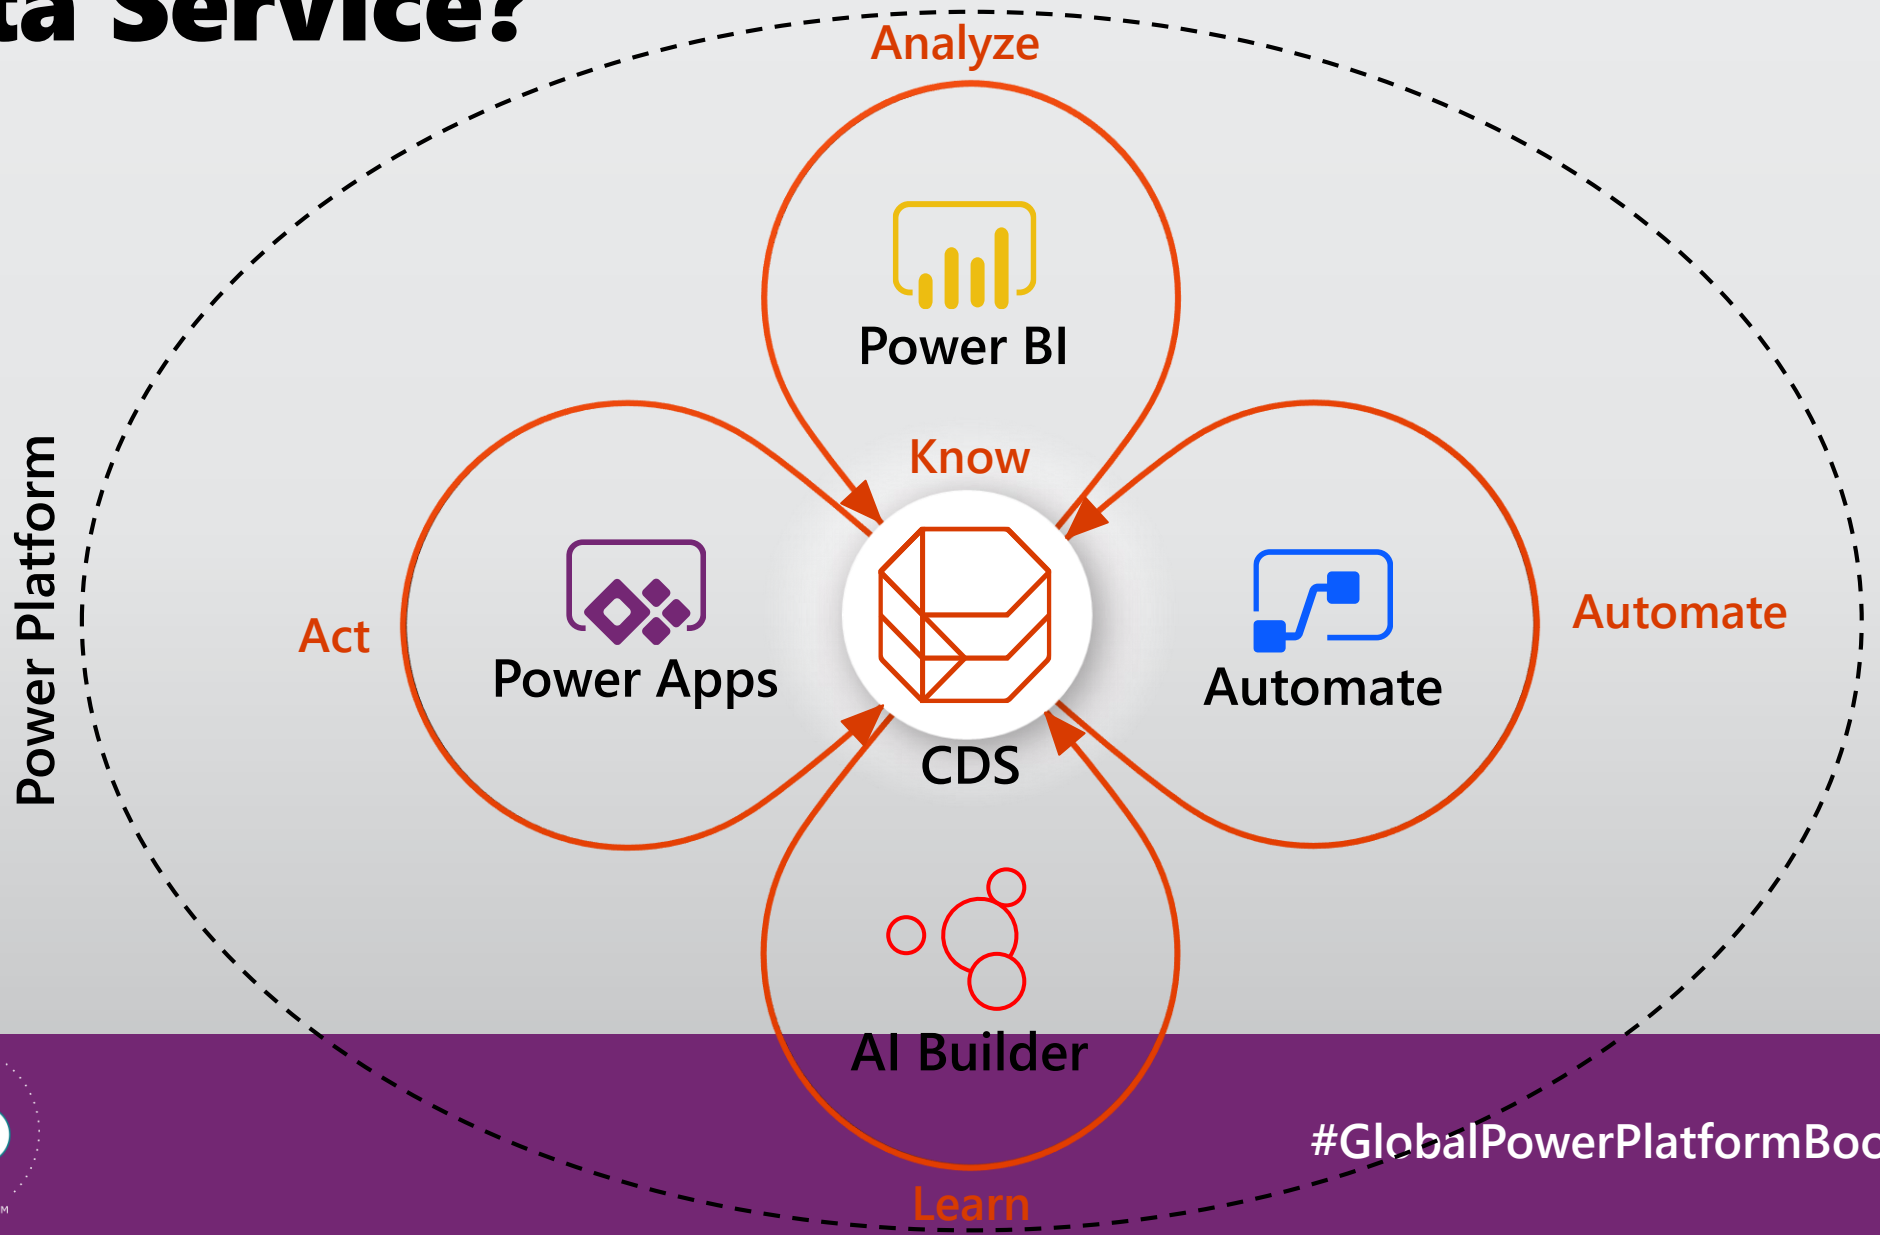
What is the Common Data Service?

The Common Data Service *easily structures*
a *variety of data and business logic* to support
interconnected applications and processes
in a *secure and compliant manner*

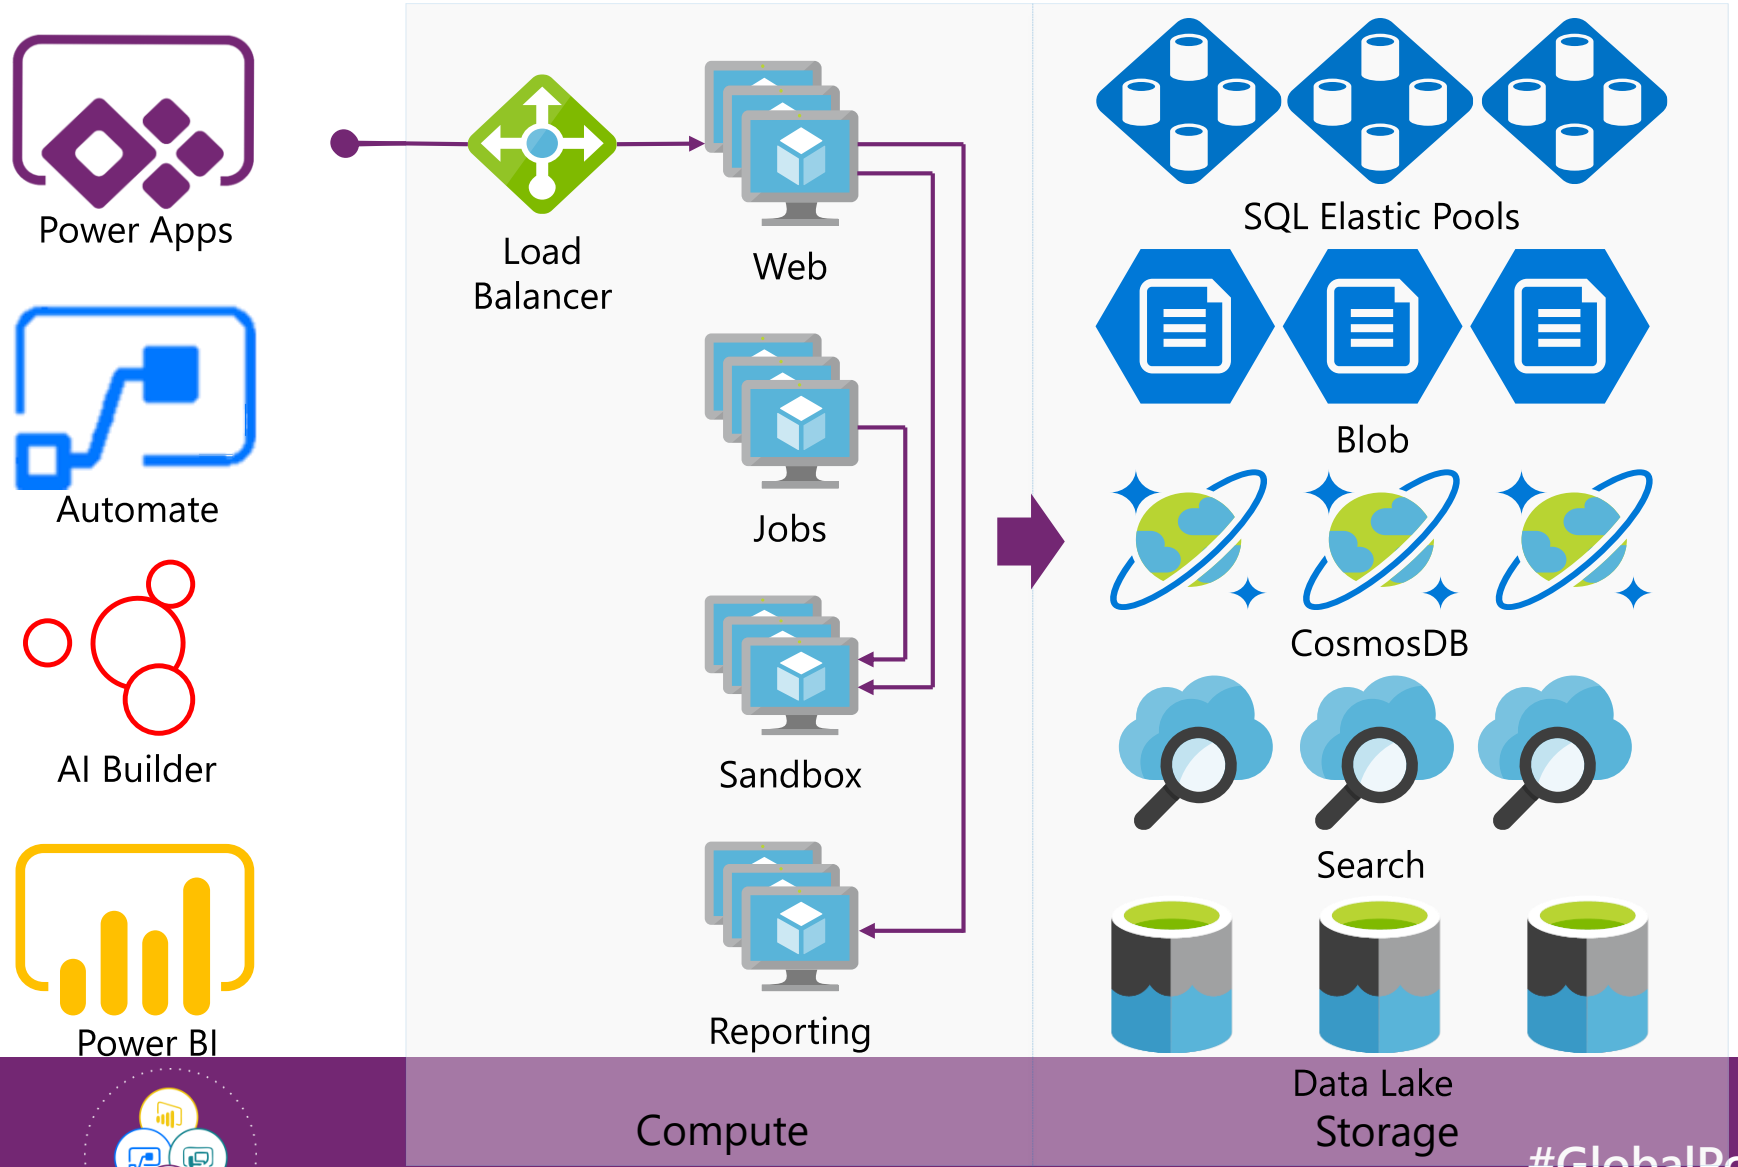
Common Data Service: What's in the box



Power Platform, Power Apps, or Common Data Service?



Common Data Service. . . Runs on Azure



Common Data Service. . . Extends with Azure

Microsoft PowerApps

#GlobalPowerPlatformBootcamp

Microsoft PowerApps is a service for creating and using custom business apps across platforms

1. Connect to existing systems and data sources
2. Build apps, forms, and workflows without writing code
3. Publish apps instantly for web and mobile
